

# XT - PICO - SXL

■ MADE  
■ IN  
■ GERMANY

## XT-PICO-SXL

Due to its extremely little dimensions of only **22 x 31 mm** and its compact type, the **XT-PICO-SXL** embedded network module is particularly suitable to be integrated even in very small terminals. A total of **two** bus systems is made available with five switchable interfaces each such as **RS232**, **RS485**, **I2C**, **SPI** and **TTL-IO**. It is even possible to use a **POE** supply (Power over Ethernet), since all necessary connections are performed. Only an additional RJ45 jack is required. All other Ethernet components such as Phyther and carrier were already integrated.

## Hardware description

## Supported systems

1. Windows
2. Linux
3. UNIX

## Supported protocols IP-Dual-Stack

- |            |                  |
|------------|------------------|
| 1. IPv4    | 20. IPv6         |

| 19. SYSLOG |                  |

## Technical data

- **Temperature range:**  
-40°C .. + 85°C
  - **Standards**  
CE / WEEE / RoHS  
EN 55022 Class B  
EN 55024 Class A
  - **Power supply:**  
3.3 volts  
170 mA
  - **Dimensions:**  
22 x 31 mm
  - **Weight:**  
4 grams
  - **Ethernet (MDIX)**  
10 Half Duplex  
10 Full Duplex  
100 Half Duplex  
100 Full Duplex  
AutoSensing
  - **Interfaces – Features**  
- All data pins 3.3 volts TTL, 10K Pullup  
- All data interfaces are freely selectable

## Management

1. Telnet
2. Browser
3. serial interface

## Emulations and functions

- Modem Emulation
- Connect-On-Data
- Auto-Connect
- Tunnel-Mode
- DYNDNS-Client
- FTP-Server
- FTP-Client
- LPR-Server
- I2C – Master
- SPI – Master / Slave
- TTL – IO
- 512KB internal flashdrive
- Flash-File system
- SD and DF CARD
- 4bit and SPI DISPLAY
- E-Mail – Client
- TCP/UDP -Client
- TCP/UDP –Server
- SYSLOG-Client

### RS232 (TTL)

It is possible to use up to 2 independent, individually operating serial interfaces. Each interface can be individually set and it is possible to transfer data rates of up to 2.500.000 bauds. Furthermore, it is possible to additionally set emulations such as modem, Auto-Connect, Connect-On-Data, TCP / UDP client using up to 10 parallel connections, TCP/UDP server, tunnel mode with transfers of the signal modes as well as settings, E-Mail client including sending and receiving of e-mails.

### RS485 (TTL)

It is possible to use up to 2 independently operating RS485 interfaces. This mode also supports so-called 2-wire components, e.g. the MAX3072E, since it does not possess a proper control wire. Each interface can be individually set and it is possible to transfer data rates of up to 2.500.000 bauds. Furthermore, it is possible to additionally set emulations such as modem, AutoConnect, Conntect-On-Data, TCP/UDP client using up to 10 parallel connections, TCP/UDP server, tunnel mode with transfer of the signal modes as well as settings, E-Mail client including sending and receiving of e-mails.

### I2C

It is possible to use up to 2 independently operating I2C interfaces. A data mode has also been implemented to achieve a maximum of flexibility. The interface can be individually set up and it is possible to transfer data rates of up to 2.500.000 bits/sec. Furthermore, you can additionally set emulations such as modem, AutoConnect, Conntect-On-Data, TCP/UDP client using up to 10 parallel connections, TCP/UDP server, E-Mail client including sending and receiving of e-mails.

### SPI

It is possible to use up to 2 independently operating SPI interfaces in the master or slave mode. Each interface can be set up individually and it is possible to transfer data rates of up to 25MBit(Master) and 2.5Mbit(Slave). Furthermore, it is possible to additionally set emulations such as AutoConnect, Conntect-On-Data, TCP/UDP client using up to 10 parallel connections, TCP/UDP server, E-Mail-Client including sending and receiving of e-mails.

By making adjustments in the setup, the SPI interface can directly operate SD cards, DF cards or Data-Flash components. An implemented Flash-File system with FAT12/16/32 structure supports the FTP to save data on it or to read data from it. Now it is possible to save your own homepage or JAVA applet in order to present a proper and individual look to the customers via the WEB server.

SD cards:

- Up to 4 GByte
- FAT12/16/32
- PC-compatible

DF cards / components:

- Up to 4 GByte
- FAT12/16/32
- AT45DB011B, AT45DB021B  
AT45DB041B, AT45DB081B  
AT45DB0161B, AT45DB0321B  
AT45DB0642, AT45DB1282  
will be directly identified.

The SPI interface can also directly control as SPI display, e.g. the EA DOGM162B-A, which you can directly use via TCP/IP.

### TTL IO

It is possible to directly control up to 14 pins via two interfaces. To do so, there is a proper control mode which can read the signals, switch them on or off. A tunnel mode allows the automatic transfer of the signal modes.

## Dimensions

### Top view

### Side view

## Top view

### Absolute Maximum Ratings

Ambient temperature under bias.....	-40°C to +85°C
Storage temperature.....	-65°C to +150°C
Voltage on VDD.....	-0.3V to +4.0V
Voltage on any 3.3 V pin.....	-0.3V to (VDD + 0.3V)
Voltage on any 5V tolerant pin .....	-0.3V to +5.5V

*All you need is an RJ45 socket and two LED's.*

### NOTE:

The LED connections can be directly used. The series resistors are already available on the **XT-PICO-XXL**. It is also possible to directly connect the RJ45 connections to the RJ45 socket. The required magnetic is also available on the **XT-PICO-XXL**.

## PIN DESCRIPTION

### PORT1:

PIN	Power	BUS	RS232	RS485	I2C	SPI	TTL-IO	Pullup	Type	VDD max
P1.1	GND								PWR	0
P1.2	VDD								PWR	+3.3 volts
P1.3	RESET							10K	I	+5V tolerant
P1.4		1	CTS0		SDA0		PIN4_0	10K	I/O	+3.3 volts
P1.5		1	RTS0		SCL0		PIN3_0	10K	I/O	+3.3 volts
P1.6		1	DTR0	R/W0		SS0	PIN5_0	10K	I/O	+3.3 volts
P1.7		1	DSR0			SCK0	PIN6_0	10K	I/O	+3.3 volts
P1.8		1	TXD0	TXD0		MISO0	PIN1_0	10K	I/O	+3.3 volts
P1.9		1	RXD0	RXD0		MOSI0	PIN2_0	10K	I/O	+3.3 volts

### PORT2:

PIN	Power	BUS	RS232	RS485	I2C	SPI	TTL-IO	Pullup	Type	VDD max
P2.1		1	DCD0				PIN7_0	10K	I/O	+5V tolerant
P2.2		2	RI1				PIN8_1	10K	I/O	+3.3 volts
P2.3		2	DCD1				PIN7_1	10K	I/O	+5V tolerant
P2.4		2	CTS1		SDA1		PIN4_1	10K	I/O	+5V tolerant
P2.5		2	RTS1		SCL1		PIN3_1	10K	I/O	+5V tolerant
P2.6		2	DTR1	R/W1		SS1	PIN5_1	10K	I/O	+3.3 volts
