# Flotilla - Dial

PIM035

The Dial module is... a dial! It has a rotary potentiometer and five bright white LEDs that illuminate as the dial is turned.

It's perfect for using as a simple game controller for games like pong, or with Rainbow to control the colour or brightness of its RGB LEDs.

**Features:**

- Rotary potentiometer
- Five birght white LEDs
- Micro USB connector

Find Flotilla Cookbook recipes that use the Dial module at http://learn.flotil.la/cookbook/ or use Dial with Rockpool at http://flotil.la/rockpool/

Or use our Python Flotilla API to control the Dial module.

**Note:** Flotilla modules require a Dock and Flotilla ropes (USB micro B to micro B cables)
